SUMMARY

Computer Science undergraduate specializing in machine learning and full-stack development, with hands-on experience building and deploying NLP and predictive-modeling systems using Python, TensorFlow, and FastAPI/React. Proven ability to deliver end-to-end applications—from data pipelines and LLM integration to production deployment.

EDUCATION

Bachelor of Technology, VIT Bhopal University

2023 - 2027

Computer Science and Engineering

CGPA: 8.48/10

SKILLS

Programming Language	Python, Java
Web & Full-Stack	ReactJS, FastAPI
Data Science & AI	TensorFlow, PyTorch, spaCy, NumPy, Pandas, Scikit-learn, OpenCV, NLTK
Tools	Visual Studio Code
Database	SQL, MongoDB

EXPERIENCE

Product Development Intern

Sept 2025 - Dec 2025

BridgeBound Academics

Remote

- Built an end-to-end admission-prediction system, training a probability model to estimate a student's likelihood of admission to a given university based on GMAT/GRE/SAT scores, academic interest, extracurriculars, and sports profile.
- Designed and implemented the FastAPI backend architecture, exposing REST endpoints to serve real-time probability scores from the trained model to the frontend/client.
- Trained and integrated the model on a dataset of 300+ student records, handling the full pipeline from model training through production API deployment.

PROJECTS

Niramaya – AI-Powered Hospital Operating System. Built a full-stack healthcare platform using React, FastAPI, and MongoDB with JWT-based authentication and role-based access control for patients, doctors, and admins. Integrated Groq AI for real-time symptom triage and automated lab-report analysis with bilingual (Hindi/English) audio narration via gTTS. ([Try it here](#))

FoodETA – Food Delivery Time Prediction App. Built an end-to-end machine learning application using Python, XGBoost and Streamlit to predict food delivery time. Performed feature engineering and regression modeling with a Streamlit-based prediction app. ([Try it here](#))

Parakh – AI Review Intelligence Extension. Built a Manifest V3 Chrome Extension and FastAPI backend to analyze reviews across e-commerce platforms. Integrated Google Gemini AI and TextBlob NLP to detect fake reviews and extract product pros and cons. Engineered dynamic DOM scraping and TTL caching for sub-second performance. ([Try it here](#))

CERTIFICATES

NPTEL Machine Learning - [Certificate](#)

Oracle APEX Cloud Developer - [Certificate](#)

Google Cloud Generative AI (SmartBridge) - [Certificate](#)

Full Stack Development (Udemy) - [Certificate](#)

ACHIEVEMENTS

- Adobe India Hackathon (Participant) - [Certificate](#)
- Dynamic Programming Camp - [Certificate](#)
